Evaluation of the company 'Vitrinen- und Glasbau Reier'

At the national as well as international level, the Museum of Prehistory and Early History in Berlin is regarded as one of the most comprehensive collections in the field of archaeology in Europe. The present reconstruction of the six exhibition halls of the Museum is made in co-operation with the company 'Reier' which has been entrusted with this project following a tender.

The previous co-operation can be evaluated as absolutely positive. The company 'Reier' endeavoured to satisfy the ideas of the direction of the Museum concerning the showcases by constructing custom products. And with own ideas and the development of technical details, the company improved the conceptual design. All works that have been realised until today – the designing of two halls - have been realised in good quality and within the time-frame discussed. The work of the company 'Reier' at the site have been realised careful, clean, correct and according to the conception of the museum.

Our house has a long-lasting experience concerning the co-operation with companies manufacturing showcases. This is why we can -compared to other companies- highly recommend the company 'Reier'.

Berlin, 15th January 2003
